

# Felicia Ainslie

Senior Product Leader | AI Security, Integrations & Enterprise Systems

## PROFESSIONAL EXPERIENCE

**CVS Health** – Geneseo, IL (Remote) | Sr. Mgr., Digital Product Management | Aug 2025 - Present

- Lead planning, financial estimation, and proposal development for multimillion-dollar cybersecurity, AI, integration, and enterprise platform product portfolios, balancing delivery execution, risk reduction, scalability, and stakeholder priorities.
- Directly manage software development (6) and product support (3) teams, setting priorities, removing blockers, coaching execution, and aligning day-to-day delivery with product and portfolio goals.
- Lead cross-functional partnership with a 12-person VSE data engineering organization, guiding data quality, reporting strategy, integrations, and platform workflow decisions through influence-based leadership.
- Partner with engineering teams across React, TypeScript, Node.js, APIs, cloud infrastructure, and event-driven workflows to guide delivery, technical prioritization, and implementation tradeoffs.
- Support engineering collaboration through code review participation, drafting implementation starters, workflow validation, and technical requirement refinement.
- Drive governance and remediation workflow improvements focused on ownership visibility, exception handling, escalation management, and operational scalability.
- Lead platform modernization efforts consolidating vulnerability data from enterprise security scanners, cloud platforms, infrastructure systems, IoT ecosystems, and external medical devices into centralized remediation, ownership, and operational reporting workflows.
- Reduced mean time to resolve (MTTR) from 101 days to 37 days through AI-assisted ownership identification, remediation recommendations, and automated SLA tracking and alerting workflows.
- Collaborate with UX and engineering teams using Figma and Miro to prototype workflows, workshop design concepts, and validate implementation approaches before development.
- Contribute to executive and operational reporting focused on risk visibility, remediation progress, platform adoption, and workflow performance.
- Support AI enablement and automation initiatives including UI-driven agent workflows and process automation designed to reduce operational friction and improve engineering efficiency.

**Nextiva** – Geneseo, IL (Remote) | Product Manager | Oct 2018 – Aug 2025

- Led product planning, release coordination, and operational delivery for UCaaS, CCaaS, integration, and enterprise platform initiatives across technical and business stakeholders.
- Owned and supported 15+ third-party SaaS and voice applications including Five9, Akixi, Go Integrator, Cisco Customer Journey, and Thrio.
- Documented and supported the full integration of the Thrio acquisition, including architecture documentation, deployment coordination, runbooks, release planning, and operational readiness.
- Led implementation of enterprise vulnerability management workflows integrating Sonatype scanning and Jira automation, reducing mean time to resolve (MTTR) from 87 days to 23 days through improved operational response, visibility, and workflow automation.
- Assisted with Cloudflare implementation efforts supporting enterprise performance, reliability, and security improvements with zero downtime.
- Collaborated with engineering teams on API integrations, workflow automation, routing logic, and operational tooling enhancements.
- Authored and maintained enterprise operational documentation including runbooks, RCA documentation, release notes, onboarding guides, and integration documentation using Markdown, Docusaurus, and Scribe.
- Designed and maintained operational dashboards and reporting to improve visibility into escalations, performance trends, workflow throughput, and team accountability.
- Partnered with engineering and UX stakeholders to prototype workflow improvements, workshop UI concepts, and validate implementation changes prior to development.
- Helped design automation workflows using Automation Anywhere to improve operational efficiency and reduce repetitive manual processes.
- Supervised 14-person Tier 2 Advanced Support operations team, mentoring team members, improving onboarding practices, and formalizing post-incident review processes to strengthen operational consistency and escalation management.
- Successfully led the BroadWorks R24 platform upgrade with zero downtime, coordinating readiness, stakeholder communication, and deployment execution.

## CONTACT

**LinkedIn:** [FeliciaAinslie](#)

**Email:** [FeliciaAinslie@gmail.com](mailto:FeliciaAinslie@gmail.com)

**Mobile:** 602-422-3902

## PROFESSIONAL SUMMARY

I thrive on solving messy problems, uncovering the right information, and bringing calm, clarity, and structure to chaotic environments where organization creates momentum.

## TECHNICAL & PRODUCT LEADERSHIP

- **Frontend collaboration:** React, TypeScript, JavaScript, CSS, Carbon Design System
- **Backend & APIs:** Node.js, TypeScript, JavaScript, Python, SQL, REST APIs, event-driven services, workflow orchestration
- **Cloud & Infrastructure:** Azure, GCP, Databricks, enterprise cloud deployments
- **Security & Identity:** Vulnerability management and enterprise security integrations including Snyk, Qualys, Wiz, Sonatype, Ping Identity, Cloudflare, and ServiceNow CMDB
- **Developer Collaboration:** GitHub, Jira, code reviews, release coordination, technical planning
- **Documentation & Enablement:** Markdown, Docusaurus, Scribe, runbooks, release notes, RCA documentation
- **Workflow & Automation:** Jira automation, Power Automate, Automation Anywhere, AI/UI agent workflows, operational process improvement
- **UX & Product Collaboration:** Figma, Miro, workflow mapping, live-page prototyping and workshop iteration
- **Observability & Reporting:** Grafana, Splunk, DataDog, Power BI

## EDUCATION

- M.S. Information Technology, Information Security & Assurance | GPA: 4.0 | Purdue University Global
- B.S. Information Technology, Programming & Software Development | GPA: 4.0, President's List, Dean's List | Purdue University Global
- A.A.S. Information Technology, Multiplatform Software Development | Kaplan University

## CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- [Responsible AI Leadership: Ethics, Trust & Accountability](#) | Skillsoft
- [Generative AI Foundations](#) | O'Reilly / Credly
- [Exploring Prompt Engineering Techniques](#) | Skillsoft
